Submission deadline:

27th October 2023

“United for Men’s Health” is the theme of the Men’s Health World Congress 2023, jointly organised by the Malaysian Society of Andrology and the Study of Ageing Males (MSASAM) and the Malaysian Clearinghouse for Men’s Health, and with the endorsement of International Society for Men’s Health. The international supporting partners include the Global Action on Men’s Health and MOVEMBER.

It is a platform for scientific discourse on Men’s Health in a broader context including epidemiology, policies, clinical advances, social determinants and delivering men’s health services, highlighting the importance of a collaborative approach in improving men’s health. The scientific papers submitted collectively aim to advance our understanding of men’s health, enhance preventive measures, and promote healthy behaviours and lifestyles, ultimately contributing to better health outcomes for men globally.

Submission Categories:

- Policies, public health and epidemiology in men's health;
- Male specific clinical conditions (such as erectile dysfunction, premature ejaculation, benign prostatic hyperplasia, prostate cancer, andrological conditions);
- Health promotion, screening, and prevention in men;
- High-risk behaviour in men (such as smoking, addiction, sexually transmitted infections);
- Mental health in men;
- Using digital technology for men’s health;
- Communication and engagement with men;
- Other men’s health related topics.

Keywords: Men’s Health; Policies; Clinical
