More Details:

Dear Colleagues,

It is our pleasure to have this special issue on "Physical health - a component of the quality of life (QOL) in men" with the Journal of Men's Health.

Health Related Quality of Life (HRQoL) it is a multidimensional concept that includes domains such as physical health, psychological well-being, social relationships, economic circumstances, personal beliefs and an individual's relationship with the environment.

Physical health is critical for overall well-being and is the most visible of the various dimensions of health, which also include social, intellectual, emotional, spiritual and environmental health. Some of the most obvious and serious signs that we are unhealthy appear physically. Addressing this dimension is crucial for anyone attempting to sustain overall health and wellness.

The purpose of this special issue is to demonstrate the correlation between physical health and QOL in men. In this special issue, we welcome the contributions that describe and list the link between physical health and QOL in terms of men's health. Your contribution is welcome in the form of an original article, case report, commentary and review. This special issue offers the opportunity to address the following types of topics.
